

PROcussionCare® WearBarrier

Makes drumheads sound
better and last longer!

PROcussionCare® WearBarrier

a copolymer micro-barrier conditioning formula
for drumheads, stick tips, and hard mallet heads.
One-step fast & easy spray-on application...

- Creates a larger drumhead "sweet spot"
- Enhances head-to-bearing-edge contact for more accurate tuning
- Provides deeper, richer drumhead tone
- Improves resonance and sensitivity to grace notes
- Increased durability of drumheads, sticks, and mallets

One simple, easy, and fast PROcussionCare® Wear Barrier application dries to the touch in seconds, lifting away contaminants and grime for improved response, more resistance to drumhead and stick breakage, and superior drum head tone and rebound.

Try PROcussionCare® WearBarrier today!

PROCUSSIONCare® WearBarrier is available in the handy 2oz aerosol can, the eco-friendly 4oz trigger bottle and the cost effective 7oz aerosol can.

HEAR AND FEEL THE DIFFERENCE®
Comprehensive Maintenance Technologies.
Lowest cost per use.

PROcussionCare® WearBarrier revitalizes drum sound and response with one easy application. At pennies per application, its a small price to play to ensure your drums are always at 100% of their potential.

Apply to drumhead for a larger "sweet spot," improved rebound, enhanced tone, and better resistance to wear.

Apply to stick tips and hard mallet heads for increased rebound and durability.

Apply to counterhoops (rims) for superior cross-sticking, rimshots, and drumhead response.

Apply to snare strainer, lug casings, and lugs to resist friction, oxidation, and corrosion.

Apply to snare stand, memory locks, basket, etc. for long-lasting lubrication and reduced friction for longer wear.

SNARE DRUM AND STAND

PROcussionCare® . . . Independently Tested. Proven Effective.

Above right are photo images of snare drum heads that were used during a 160 hour play test. One head was treated and one un-treated with PROcussionCare WearBarrier. The images clearly show the significant ability of WearBarrier to protect and reduce surface wear.

HEAR & FEEL THE DIFFERENCE®

Drummers and percussionists know that lot of factors come together in creating a successful performance. There are the endless hours spent woodshedding at home and rehearsing with bandmates. A drum set combines many separate elements: drums, cymbals, percussion, drumheads, sticks, and hardware. However in terms of products to care for and preserve the sound of their instruments, drummers have been largely underserved. There have been a scattering of products available, but never a complete maintenance care solution for drums—until now. PROcussionCare® Wear Barrier is a breakthrough conditioning and lubricant formula for drumheads and sticks that transforms the critical area of gear maintenance to prevent excess wear and optimize sound quality. PROcussionCare's breakthrough micro-barrier conditioning technology removes embedded dirt and grime, leaving a micro-thin coating for better drumhead-to-bearing-edge contact. This creates an enhanced sweet spot, the central area of the drumhead with the most desirable tone. Overall sound is improved, heads and sticks last longer, and tuning becomes easier and more accurate. Your drum gear is important—make sure that your stage setup won't let you down—make sure PROcussionCare Wear Barrier is in your gig bag. Three sizes are ideal for use in the shop, on the road, or in the studio. Also available with PROcussionCare CymbalCare and PedalLube in a three-pack for a total drum maintenance package.

Drum Maintenance Made Easy

Formulated especially for the high-impact demands of drums and percussion, PROcussionCare Wear Barrier is the result of research into micro-lubricants for demanding ballistics applications. With an astounding ability to penetrate and lift away deeply embedded grime and tiny debris particles, PROcussionCare ensures that your drum's vibration and response is unrestricted. A micro-thin barrier lubricant coating remains after treatment to resist sticking impacts, promote enhanced tone, and allow increased stick rebound. Recommended application is with a soft lint-free cloth. Product quickly dries to the touch for immediate use. Available in three sizes for rehearsal room, sound studio, or touring shows.

PROcussionCare®—Uniquely Effective, Environmentally responsible

WearBarrier's non-toxic formula is made expressly for use on drumheads, stick tips, and hard mallet heads. Silicone and teflon free. The proprietary formulation is the culmination of years of research and development in flex-film technologies, and has been a cornerstone of private label products since 1986.
